University of Veterinary Medicine Budapest, Hungary

University of Veterinary Medicine Budapest – One of the Oldest Veterinary Schools in the World

This European-standard faculty still operates on small scale and it enrolls only a limited number of students each year keeping a familiar atmosphere in the historical campus located in the middle of Budapest. In fact, the Chair of Animal Healing at the Faculty of Medicine was established in 1787 shortly after the foundation of the first veterinary school in the world (in Lyon in 1762). As an independent institution the school earned an international reputation in the first half of the 20th century. In the 1990's a Field Station and a Large Animal's Clinic was built outside Budapest providing a bigger supply of horses and cattle for the students in the clinical years. Since the foundation of the international programs in 1989 around 2000 international students were enrolled.

Budapest – An Exciting Metropolis in Central Europe

Budapest – "a Little Paris on the Danube" (from National Geographic) – has more to offer than you can expect. The majestic River Danube separates hilly and residential Buda from lively and cultural Pest. The skyline of the Buda Castle Hill above the Danube, the city's first main avenue and some other parts of Budapest are recognized as UNESCO World Heritage sites. The biggest capital in Central Europe attracts crowds of visitors – students, businessmen, and tourists – to meet Hungarian hospitality, experience our culture, or find the potential for business success. The Hungarian capital offers a lot for the international student community, as well. Cinemas, theatres playing in English, international festivals, reasonable prices, and lively nightspots make the city attractive to students.

McDaniel College – Pre-Medical Program

Budapest – Hungary

If you want to study at University of Veterinary Medicine Budapest, but don't feel prepared for it, the Pre-Medical (veterinary) Program is specially designed for you. The Program is created for students who would like to obtain their veterinary degree in English but lack the sufficient knowledge of the language and/or the knowledge of medicine related subjects. After completing the program you have excellent chances to receive admission to universities. The Pre-Medical Program provides a smooth adaptation year for all the newcomers. Our professors care about teaching and they care about you. You will meet international students from different cultures in small-size groups, so the Pre-Medical Program is also a social experience. You will get adapted to an independent way of living and discover a new world. Social events, trips will also make it an unforgettable experience. No entrance examination for the Program.

Length of Studies

- 1 or 2 semesters starting each October and January
